Raytheon / SAMSUNG AS-9 Ballistic Protection (LAND 17): SEAL Solutions has been selected by Raytheon Australia to provide its appliqué armour, SEAL Solutions / Combat Clothing Australia spall liner and mine blast protection systems for the Land 17 tender response. More [information regarding this project](#) may be found on the Raytheon Australia website.

Consulting Contract Work.

MD Gets Hands Dirty: SEAL Solutions has been contracted to provide Project Management support to the ASLAV Crew Procedural Trainer (CPT) project in order to contract for Through Life Support (TLS) services for the capability. The task has fallen to our Managing Director, Mr. Simon Prendergast, as his subject matter expertise in this area is significant, given his prior involvement in systems engineering, test and evaluation, and acceptance of the Mission System on behalf of the Commonwealth. This follow on task involves the development of all project and technical documentation in support of the Request For Tender (RFT) activity, and

the management of the Source Selection process. More [information regarding this project](#) may be found on the Defence website.

Land 121: SEAL Solutions has been contracted to provide Engineering Management and Support services to the Overlander Phase 3 Program. SEAL Solutions is providing a team of experienced and dedicated personnel lead by Mr Tony Walton in the role of Systems Engineering Manager for the acquisition of the Lightweight Light Capability. Areas of specialisation include Mr Phil Barner as Systems Engineer for the heavy vehicle replacement, Ms Mary Sangas as Systems Engineer for medium weight vehicle replacement and managing the vehicle test and evaluation program and Mr David Rodger as Project Manager for the implementation of the Configuration Management System. The support includes assisting the Commonwealth on the engagement of Industry through an RFT activities, tender evaluation, verification of compliance claims through testing, undertaking contract negotiations, undertaking systems engineering activities in contract, verification and validation, and acceptance of the Mission System. More [information regarding this project](#) may be found on the Defence website.

Prime Vendor - Medical Consumables: SEAL Solutions has been contracted to provide Project Management support to the Health Systems Program Office, Land Systems Division. Our Program manager, Mr. Morgwn Wood, has been contracted to consolidate the existing 68 standing offers for procurement of medical consumables into a more streamlined process in line with modern business practices. The support will involve the engagement of Industry through an RFT activity, management of the source selection process, and ensuring a successful Phase In for the newly contracted Vendor(s). More [information regarding this project](#) may be found on the Defence website.
